

Sample Comparison Reports

In this work with teams, team leaders and organizations one thing that sets the TCI methodology apart from others in the field is the ability to measure. Organizations know, "What gets measured gets improved."

Because all four assessments are based on the same model and use a common set of graphics, you have the ability to show comparisons easily. Each comparison shows an overlay of the two views with the key results from the report: Quad Diagram, Polar Diagram, and Bar Charts.

There are many variations:

- > Team Diagnostic™ comparing results from "before" coaching and "after" coaching
- > Team Diagnostic™ vs. Team Leader View™
- > Team Diagnostic™ vs. Team 360 View™
- > Team Diagnostic™ vs. Organization View™

We can also create overlays from a segmented Team 360 View™ or Organization View™:

- > Team 360 View™ comparing Stakeholder Set #1 with Stakeholder Set #2
- > Organization View™ comparing one demographic set with another. For example, compare two regions or two levels in the organization.

Samples

In this document, we provide these samples:

- > Team Diagnostic™ Before and After Comparison Report
- > Team Diagnostic™ vs. Team Leader View™ Comparison Report

Special reports requests take at least two business days to produce once a deployment has closed and we also need to make sure the deployment is set up properly for the type of report you want. For special report pricing, set up considerations and scheduling, please contact:

Welcome to the Team Diagnostic™

Teams are the engines that
drive successful organizations.

Teams produce results that individuals simply can't, acting alone. Today, the workplace is a maze of nested teams: intact, cross-functional, project, virtual — and the pressure is on teams to form, perform and reform at an astonishing rate.

The Team Diagnostic™ is a state of the art instrument, based on a proven model that defines the necessary strengths for high-performing, sustainable, inspired teams.
